

BILL HIGHLIGHTS

Bill 337 – Registering Interior Designers:

- Purpose; links consumers to the trained professionals.
- On-line process, self supported by fees, with no additional cost to taxpayers or government.
- Government financially supports the academics they fund at the Universities with Interior Design Programs.
- No on-going personnel support needed from the PLA or professional licensing agency.
- People can still call themselves interior designers, just not registered interior designers if they are not registered. Appropriately.
- NO STAMPING, this is only a registry.
